SUMMARY

Backend engineer with eight years building payment and ledger systems at high transaction volume. Comfortable owning a service end to end, from schema design through on-call, and happiest on the parts of a system where correctness actually matters.

PROFESSIONAL EXPERIENCE

Senior Software Engineer
Northwind Systems

Mar 2021 – Present
Austin, TX

- Rebuilt the payments ledger on an append-only model, cutting month-end reconciliation from four days to under three hours.
- Led the migration of 40 services off a shared database, running the cutover with no customer-visible downtime.
- Introduced contract tests between the billing and ledger services, which caught 14 breaking changes before they reached staging.

Software Engineer
Contoso Retail

Jun 2018 – Feb 2021
Dallas, TX

- Built the inventory reservation service handling 3,000 requests per second at peak.
- Cut p99 checkout latency from 1.8s to 340ms by removing a synchronous call to the pricing engine.

EDUCATION

University of Texas at Austin
B.S. Computer Science

2014 – 2018
GPA 3.7

TECHNICAL SKILLS

Python, Go, PostgreSQL, Kafka, Redis, Docker, Kubernetes, Terraform, AWS
